

Painting Estimating Software

The EDGE® is takeoff and estimating software built specifically for commercial painting contractors. Easily measure onscreen and pull live pricing from your suppliers to turn takeoffs into winning bids.

The Features You Need to Bid Painting Projects:

All-in-One Takeoff and Estimating

Count and measure in one system with real-time updates that reduce errors and delays.

Vendor Quote

Request pricing from vendors and distributors and get quotes imported directly into bids.

Smart Labor® Technology

Adjust labor rates in real-time based on task complexity.

Painting-Specific Assemblies

Automatically calculate rates by assigning material and labor combinations for application methods.

Proposal Writer

Customize proposal templates that pull values automatically — no manual re-entry.

The EDGE's Customizable Painting Reports:

- **Paint Color Chart** — Primer and paint applications
- **Drawing Report** — Visualized estimate
- **Stocking Report** — Materials by quantity
- **Pricing Report** — Materials by unit pricing
- **Labor Report** — Time on labor
- **Recap Report** — Overview of costs
- **Consolidated Report** — Budget creation
