

## Roofing Estimating Software

The EDGE® is takeoff and estimating software built specifically for commercial roofing. Easily measure onscreen and pull live pricing from major manufacturers to turn takeoffs into winning bids.

### The Features You Need to Bid Roofing Projects:

#### All-in-One Takeoff and Estimating

Count and measure in one system with real-time updates that reduce errors and delays.

#### Tapered Insulation Module

Measure tapered systems in-house with a provided layout showing fastener sizes and board counts — no calculations or waiting on suppliers.

#### Standing Seam Module

See your entire roof at a glance — including a cut-list and layout with every panel labeled and sized.

#### Waterproofing Capabilities

Set up waterproofing types and configurations, perform takeoff and calculate a complete tally of materials and production costs.

#### Proposal Writer

Easily customize proposal templates that pull values automatically — no manual re-entry.

#### Eagleview® Integration with EDGE Smart Takeoff

Import high-resolution aerial imagery and 3D property data directly into takeoff.

### Benefits of The EDGE's Roofing Estimating Software

- Estimate with confidence using cloud-based, real-time data
- Customize reports for pricing, labor, drawing and more
- Compare your roofing supplier pricing with Vendor Quote
- Get backed by the industry's best customer service
- Integration with leading software such as FOUNDATION® and QXO
