# EDGE

^FOUNDATION software

Dealing with point solutions can create data overlap and inaccuracies, but with the integration between The EDGE® Estimator and FOUNDATION® you can seamlessly connect your back-office software solutions!

As you build your estimate, every line item is assigned a cost code and cost class so there is no need for accounting to manually add. And once the estimate is complete and job is awarded, the project information and budget are synced to FOUNDATION, so accounting can drill down to any item!
