the EDGE®

Fireproofing Estimating Software

The EDGE® is a takeoff and estimating software built specifically for fireproofing subcontractors. Easily perform measurements on-screen with formulas that auto-assign thicknesses and pull from customizable databases with major industry manufacturer products, steel shapes, UL designs and more.

The Features You Need to Bid Fireproofing Projects:

All-in-One Takeoff and Estimating
Count and measure in one system with real-time updates that reduce errors and delays.

Fireproofing-Specific Assemblies
Easily calculate thicknesses, board footages and bag counts from steel takeoffs.

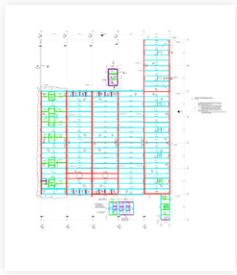

Generate Spray Charts (Color-Ups) and Submittals
Color-code spray thicknesses automatically and produce shop drawings

Cloud-Based System
Secure your data inside the cloud, so your team can work together even when apart.

Industry-Leading Support
Get backed by the industry's best customer service in sales, support and training.

The EDGE's Customizable Fireproofing Reports:

- **Spray Chart Report** — Floor-by-floor breakdown of spray thicknesses
- **Fireproofing Report** — Floor-by-floor breakdown of surfaces and product quantities
- **Fireproofing Drawing Report** — Automatically generate submittal drawings
- **Totals Report** — Overall summary of materials and costs
